

**GANDHI INSTITUTE OF ENGINEERING AND
TECHNOLOGY UNIVERSITY, ODISHA, GUNUPUR**

SCHOOL OF MANAGEMENT STUDIES

Bachelor of Business Administration

(For Students admitted from academic year 2023 onwards)

CURRICULUM AND SYLLABUS

SCHOOL OF MANAGEMENT STUDIES

**GANDHI INSTITUTE OF ENGINEERING AND
TECHNOLOGY UNIVERSITY, ODISHA, GUNUPUR**

Programme Outcomes (POs)

Upon successful completion of this BBA Program, students should develop the ability to:

- PO1:** Apply knowledge of management theories and practices to solve business problems.
- PO2:** Foster Analytical and critical thinking abilities for data-based decision making.
- PO3:** To develop Value based Leadership skills.
- PO4:** Ability to understand, analyse and communicate global, economic, legal, and ethical aspects of business.
- PO5:** Ability to lead themselves and others in the achievement of organizational goals, contributing effectively to a team environment.

Program Specific Outcomes (PSOs)

- PSO1:** To imbibe the students with requisite domain knowledge, skills & right attitude necessary to provide effective leadership in a global environment.
- PSO2:** To develop competent management professionals with strong ethical values, capable of assuming a pivotal role in various sectors of the Economy.
- PSO3:** To inculcate proactive thinking to ensure effective performance in the dynamic socioeconomic and business ecosystem.

Program Educational Objectives (PEOs)

- PEO1:** To Impart formal knowledge in all broad areas of business management and leadership and in-depth knowledge in functional areas of business.
- PEO2:** To develop professional skills for employment, entrepreneurship and lifelong learning in management and to adapt to a rapidly changing environment with learned and applied new skills.
- PEO3:** To establish as effective professionals by solving real problems through the use of management science knowledge and with attention to team work, effective communication, critical thinking and problem solving skills.
- PEO4:** To impart in-depth knowledge in all the functional areas of business theories and practices and to develop competence for effective business plans & execution and decision making.
- PEO5:** To produce industry ready graduates having highest regard for Personal & Institutional Integrity, Social Responsibility, Teamwork and Continuous Learning.

BBA I SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB101	INTRODUCTION TO BUSINESS	3	0	0	3

Course Description

This course provides an introduction to the dynamic world of business. The students are introduced to the dynamic world of business organization, from the sole proprietorship (entrepreneur) to the corporation. Through discussion, students will be able to compare and contrast sole proprietorships, partnerships, and corporations - and the advantages and disadvantages of each. Students will also explore the functions of modern business management, marketing, and ethics that can improve business productivity.

Course Objectives

1	To define the basic concept of business and business environment.
2	To learn qualities of a successful businessman and implement in their careers.
3	To understand the basic forms of business ownership; sole proprietorships, partnerships and corporation.
4	To define the principles and designing of an organizational structure: Formal and informal organizations- Line and staff organization.
5	To understand the types of ethical concerns and social responsibilities that arises in the business world.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Communicate effectively using elementary terms and concepts of business principles.
CO2	Describe common forms of business ownership; sole proprietorships, partnerships and corporation.
CO3	Analyse the operations of public and private company.
CO4	Analyse the methods and procedures used by people in business to arrive at effective decisions.
CO5	Examine values, social responsibility, and ethics in business settings.
CO6	Demonstrate problem solving skills in a business context.

0=No Relevance; 1=Low Relevance; 2=Medium Relevance; 3=High Relevance

Syllabus
Unit-I: Introduction to Business Meaning of business, purpose and mission, objectives, strategies, policies, procedure, programs, budgets; nature of business; objectives of business; essentials of a Successful business; qualities of a successful businessman; Classification of industries; Modern business environment; Business process.
Unit-II: Forms of Business Organizations Meaning and definition; characteristics of an ideal form of business organization; Sole Trader: Meaning; features; merits and demerits. Partnership: Meaning, characteristics; Kinds of Partners; partnership deed; dissolution of partnership firms.
Unit-III: Joint Stock Company Meaning and definition; characteristics; kinds of companies; distinction between private and public company; merits and demerits of company form of organization; Statutory corporations; company formation.
Unit-IV: Organizational Structure Formal and informal organizations- Line and staff organization; Principles underlying designing of a structure. Structure and Management of Co-operative Organizations. Government and co-operative system.
Unit-V: Modern Business Challenges and Practices Globalization and Its Impact on Business, Technological Advancements, Sustainable Business Practices, Social Responsibilities and Obligations of Business Management.

GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA I SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB102	BUSINESS COMMUNICATION	3	0	0	3

Course Description

The course is a unified approach to enhance language skills of learners with an aim to hone their social skills and to increase their employability. The course is designed to acquaint the learners with the necessary LSRW (Listening/ Speaking / Reading/ Writing) skills needed either for recruitment or further studies abroad for which they attempt international exams like TOEFL, IELTS and GRE. It enables the learners improve their communication skills which are crucial in an academic environment as well as professional and personal lives.

Course Objectives

1	To enable learners to develop listening skills for better comprehension of academic presentations, lectures and speeches.
2	To hone the speaking skills of learners by engaging them in various activities such as just a minute (JAM), group discussions, oral presentations, and role plays.
3	To expose learners to key Reading techniques such as Skimming and Scanning for comprehension of different texts.
4	To acquaint the learners with effective strategies of paragraph and essay writing, and formal correspondence such as email, letters and resume.
5	To provide learners with the critical impetus necessary to forge a path in an academic environment, in the professional life and in an increasingly complex, interdependent world.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Think critically, analytically, creatively and communicate confidently in English in social and professional contexts with improved skills of fluency and accuracy.
CO2	Write grammatically correct sentences employing appropriate vocabulary suitable to different contexts.
CO3	Comprehend and analyse different academic texts.
CO4	Make notes effectively and handle academic writing tasks such as Paragraph writing and Essay writing.
CO5	Effectively handle formal correspondence like e-mail drafting and letter writing.
CO6	Apply analytical and problem-solving strategies to identify and interpret facts and opinions from a dialogue.

CO-PO & PSO Mapping (Articulation Matrix)

COs	POs					PSOs

CO1	0	2	0	3	0	2	0	0
CO2	0	0	0	1	0	1	0	0
CO3	0	0	0	1	0	1	0	0
CO4	0	0	0	0	0	1	0	0
CO5	0	0	0	1	0	1	0	0
CO6	2	2	0	2	0	2	0	1
AVG	0.33	0.67	0.00	1.33	0.00	1.33	0.00	0.17

Justification of the Mapping:

0=No Relevance; 1=Low Relevance; 2=Medium Relevance; 3=High Relevance

Syllabus

Unit-I

- Listening: Listening for gist and specific information.
- Speaking: Introducing self and others; Developing fluency through JAM.
- Reading: Skimming for gist and Scanning for specific information.
- Writing: Paragraph writing-writing coherent and cohesive paragraph (narrative and descriptive); use of appropriate Punctuation.
- Grammar & Vocabulary: Articles & Prepositions; Word Families (Verbs, Nouns, Adjectives, Adverbs; Prefixes and Suffixes)

Unit-II

- Listening: Listening for Note taking and Summarizing.
- Speaking: Role plays and Oral Presentations.
- Reading: Intensive Reading-Reading for implicit meaning.
- Writing: Note making and summarizing.
- Grammar & Vocabulary: Verb Forms-Tenses; synonyms to avoid repetition in speech and writing.

Unit-III

- Listening: Listening for presentation strategies: introducing the topic, organization of ideas, conclusion.
- Speaking: Aided presentations.
- Reading: Inferring using textual clues.
- Writing: Formal Letter and Email writing.
- Grammar & Vocabulary: Active and Passive Voice; linkers and discourse markers.

Unit-IV

- Listening: Listening for labelling-maps, graphs, tables, illustrations.
- Speaking: Aided group presentation using charts, graphs etc.
- Reading: Reading for identification of facts and opinions.
- Writing: Information transfer (writing a brief report based on information from graph/chart/table).
- Grammar & Vocabulary: Subject-verb agreement; language for comparison and contrast; Antonyms.

Unit-V

- Listening: Listening to discussions for opinions.
- Speaking: Group Discussion.
- Reading: Reading for inferences.
- Writing: Guided Essay Writing (argumentative).
- Grammar & Vocabulary: Editing short texts: correcting common errors in grammar and usage; Action verbs for fluency and effective writing.

SCHOOL OF MANAGEMENT STUDIES
GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA I SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB103	BUSINESS MATHEMATICS	3	0	0	3

Course Description

The course is designed to understand and acquire knowledge and skills in Basic Mathematics for solving business problems. To provide practice in the handling of business problems that deal with day-to-day transactions encountered by business administrators. To use the results of mathematical calculations to help evaluate various options in reaching financial decisions, whether personal or business-related. Upon completion of the course the students will be, familiarized with the nature of business problems and Able to analyze and take business decisions in day to day transactions.

Course Objectives

1	Explain the concepts and use equations, formulae, and mathematical expressions and relationships in a variety of contexts.
2	Apply the knowledge of mathematics in solving business problems.
3	Analyse and demonstrate mathematical skills required in mathematically intensive areas in Economics and business.
4	Integrate concept in international business concepts with functioning of global trade.
5	To enable students to understand various terms and formulae involved in computation of profit or loss and enable them to calculate the same.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Students would examine the application and would calculate ratio, proportion, variation and percentage.
CO2	Students will perform matrix operations including addition, subtraction, multiplication, and find the transpose, determinant, and inverse of matrices. They will solve systems of equations using Cramer's Rule and the Matrix Inversion method.
CO3	Students will apply differentiation rules, including logarithmic and partial differentiation, to solve problems involving rates of change. They will analyze functions for maxima and minima using differentiation techniques.
CO4	Students will be able to apply mathematical concepts and techniques to solve real-world business problems, including those involving finance, operations, and economics.
CO5	Students will evaluate and compute maximum revenue, minimum cost, and understand supply curves in both short and long periods under perfect competition.
CO6	Recall, relate, discuss and solve practical problem involving the concepts of interest, rate of interest, annuity and instalments

CO-PO & PSO Mapping (Articulation Matrix)

COs	POs					PSOs

GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA I SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB104	PRINCIPLES AND PRACTICES OF MANAGEMENT	3	0	0	3

Course Description

This course provides a foundational understanding of key management concepts and practices crucial for effective leadership. Covering essential topics such as planning, organizing, leading, and controlling, the course emphasizes practical applications through case studies and real-world scenarios. Students will explore various management theories, develop critical decision-making skills, and learn strategies for ethical leadership and organizational change. Designed for future managers and business professionals, this course combines theoretical knowledge with practical skills to prepare participants for successful careers in management.

Course Objectives

1	To demonstrate an understanding of current and relevant management knowledge.
2	To understand the evolution of management thought and its relevance in decision making.
3	To understand the importance of structure and types and organization in the field of Management.
4	To learn the principles, techniques and concepts needed for managerial planning, process and decision making.
5	To describe the effective management of planning organizing influencing and controlling related to the internal and external environment.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Understand theoretical aspects, process and principles, scope of Management and its application to Modern Management.
CO2	Analyse how the field of management has evolved and its major contributions.
CO3	Analyse and apply critical role of managers in modern organizational settings
CO4	Illustrate and evaluate the importance of planning, organising, directing and controlling decision making.
CO5	Utilize data and research to support decision-making.
CO6	Evaluate and apply ethical considerations in management practices.

GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA I SEMESTER (R23)

Course Code	Course Title	L	T	P	C
BB105	BASIC FINANCIAL ACCOUNTING	3	0	0	3

Course Description

This course provides a comprehensive introduction to the principles and practices of financial reporting and analysis. Students will learn how to prepare, interpret, and analyse financial statements, including balance sheets, income statements, and cash flow statements. The course covers key topics such as accounting standards, accrual accounting, and the use of financial data for decision-making. Through hands-on exercises and case studies, participants will gain the skills needed to understand financial performance, ensure accuracy in reporting, and make informed business decisions based on financial information.

Course Objectives

1	Know the accounting frame work to prepare final accounts of trading concerns.
2	Analyse and interpret the accounting information of financial statements for decision making.
3	Understand the cost sheet preparation process and tracing of Activities for the cost object through activity-based costing.
4	Value the concepts of marginal costing and its application in managerial decision making.
5	Develop the budgets and performance reports for planning and control purposes.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Prepare financial statements, including the Profit and Loss Account and Balance Sheet, using the accounting equation and basics of IFRS.
CO2	Analyse financial statements and will prepare funds flow and cash flow statements to assess financial health and performance.
CO3	Identify and categorize elements and types for accurate overhead allocation and cost management.
CO4	Apply marginal costing techniques to make informed decisions about pricing, production, and sales strategies by analysing cost-volume-profit relationships.
CO5	Understand the concepts of budgeting and budgetary control and implement zero-based budgeting to effectively manage financial planning and control.
CO6	Analyse financial data and prepare reports that support strategic decision-making processes.

BBA I SEMESTER (R23)

Course Code	Course Title	L	T	P	C
BB106	INFORMATION TECHNOLOGY FOR MANAGERS	3	0	0	3

Course Description

This course is designed to equip management students with essential skills in information systems and advanced MS Excel functionalities. It emphasizes practical applications such as spreadsheet-based decision support systems, data analysis, and business analytics. The course also covers macro programming and introduces students to business analytics, enabling them to leverage technology for informed decision-making and effective management practices.

Course Objectives

1	To understand the role and significance of Information Systems in organizational decision-making.
2	To develop proficiency in using MS Excel for data management and analysis.
3	To learn and apply various functions and tools in Excel for advanced data processing.
4	To explore the application of macros and VBA in automating tasks in Excel.
5	To introduce the concepts and applications of Business Analytics in managerial contexts.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Demonstrate an understanding of Information Systems and their role in organizations.
CO2	Apply MS Excel functions and tools for data management and decision support.
CO3	Utilize advanced Excel features like Pivot Tables and What-If analysis for complex data analysis.
CO4	Implement and automate tasks using Macros and VBA in Excel.
CO5	Analyse and interpret data using Business Analytics concepts and tools.
CO6	Apply business analytics methods and models for informed decision-making in managerial practices.

BBA II SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB201	BUSINESS ECONOMICS	3	0	0	3

Course Description

In today's competitive business environment, effective managerial decision making requires use of economic concepts and tools. Business efficiency depends on minimization of cost and maximization of production which requires perfect understanding of the economic concepts like demand, supply, production, cost and market conditions. Managerial economics uses economic concepts and principles by emphasizing on demand analysis, production & cost analysis and different market structures which are fundamental for further study. This course also introduces important macroeconomic concepts which are indispensable for understanding the functioning of an economy. Knowledge about those concepts is useful for timely business decisions.

Course Objectives

1	To introduce students to the basic elements of micro economics.
2	To make the students understand the concept of demand and its application in economic analysis and forecasting.
3	To specify the importance of cost and output relationships to take production decisions
4	To equip students with the different cost concepts and ways to achieve the different objectives of the firm.
5	To render capable students to identify various market structures relevant for commercial transactions and their impact on business decisions
6	To make the students understand the working and growth of a business unit in the market oriented economic system.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to understand and identify the economic variables in general business atmosphere.
CO2	Able to understand how prices get determined in markets, how market participants benefit in the form of consumer and producer surplus, and consequences of government intervention.
CO3	Able to understand the different costs of production and how they affect short and long run decision.
CO4	Able to derive the equilibrium conditions for cost minimization and profit maximization.
CO5	Able to understand economies of scale, diseconomies of scale, economies of scope, and cost complementarities, and how each affects the cost of production.
CO6	Apply the economic way of thinking to individual decisions and business decisions.

Syllabus

Unit-I: Introduction to Managerial Economics

Definition, Nature and Scope, Relationship with other areas in Economics, Significance of Managerial Economics in functional areas of business. The role of managerial economist. Basic economic principles.

Unit-II: Theories of Firm and Demand & Supply Analysis

Managerial theories of firm, Behavioral theories of firm, Elasticity of demand, types and significance of Elasticity of Demand. Measurement of price Elasticity of Demand, Law of Supply, Elasticity of Supply. Need for Demand forecasting, Types of forecasting techniques.

Unit-III: Production Analysis

Production function, Marginal Rate of Technical Substitution, Production function with one/two variables, Isoquants and Isocosts, Cobb-Douglas Production Function, Returns to Scale and returns to factors.

Unit-IV: Cost Theory and Estimation

Cost concepts, determinants of cost, Cost-output relationship in the short run and long run, Average cost curves, Economies of scale. Cost-volume-profit analysis.

Unit-V: Pricing and Profit Management

Features and Types of different competitive situations, Price Output determination in Perfect competition and Monopolistic competition both in the long run and short run. Pricing methods in practice. Profit Management- Nature, scope and theories of profit.

GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA II SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB202	MANAGERIAL COMMUNICATION	3	0	0	3

Course Description

This course focuses on developing effective communication skills essential for successful management. Students will learn how to craft clear and persuasive messages, manage interpersonal interactions, and lead productive meetings. Emphasizing both verbal and written communication, the course covers techniques for improving presentations, negotiating, and handling conflict. Through practical exercises participants will enhance their ability to communicate strategically and build strong professional relationships, equipping them to lead teams and influence stakeholders effectively.

Course Objectives

1	To develop learners' awareness of the communication process
2	To develop effective listening skills in students so as to enable them to comprehend instructions and become a critical listener.
3	To develop effective writing skills so as enable students to write in a clear, concise, domain-specific and audience-centred manner.
4	To develop ability to communicate effectively with the help of electronic media.
5	To familiarize the learners with the nuances of corporate communication.
6	To develop effective spoken language skills so as to enable students to speak confidently, interpersonally as well as in groups.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to understand the scope of communication and learn its importance and implication strategies.
CO2	Able to recognize and learn the sub-skills of listening and speaking and be able to deliver effectively in the real time contexts
CO3	Able to imbibe the mechanics of writing and construct effective paragraphs which befit in a longer composition
CO4	Able to use different forms of written communication techniques to make effective internal and external business correspondence.
CO5	Able to produce different types of reports with appropriate format, organization and language.
CO6	Able to apply the fundamentals of interpersonal communication and Interpersonal relationship

Justification of the Mapping: 0=No Relevance; 1=Low Relevance; 2=Medium Relevance; 3=High Relevance								
Syllabus								
Unit-I: Introduction to Communication and Listening Skills Purpose of Communication; Process of Communication; Differences between Technical and General Communication; Barriers to Communication; Types of Communication; Situational Dialogues, Finding a solution to a problem through discussion. Listening Process; Classification of Listening; Purpose of Listening; Common Barriers to the Listening Process; Reading Skills: Reading Skill; Purpose of Reading; Types of Reading; Techniques for Effective Reading.								
Unit-II: Communication in Organisations and Communication Network Internal Communication; Stake Holders in Internal Communication; Channels of Internal Communication; Internal Tele-conversation: Self-introduction, seeking & giving information, giving messages, expression of gratification (thanks giving) External Communication; Stake Holders in External Communication; Channels of External Communication. Cross organizational video-conferencing; Briefing the organization, description of product/ process/ services, holding meetings over Skype. Scope and Types of Communication Network; Formal and Informal Communication Network.								
Unit-III: Business Letter, Memos, Circulars and Notices Importance of Business Letters; Difference between Personal and Business Letters; Structure and Format of Business Letters; Types of Business Letters. Writing E-mail: Principles of E-mail; E-mail Etiquette; Overcoming Problems in E-mail Communication. What is a Memo? - Principles of précis writing- Approaches to memo writing- Format of a Memo; Circulars- Guidelines for writing a circular- Format of a circular; Notices- Purpose- Format- Important points to remember while writing a notice The White tiger by Arabind Adiga.								
Unit-IV: Report Writing and Oral Communication Skills Features of Writing a Good Report; Purpose of Report Writing; Difference between Business Report and Engineering Report-; Steps in Report Writing; Structure of Report; Types of Reports and Different Formats. Oral Business Presentation- Purpose –Audience Locale; Steps in Making a Presentation- Research and Planning-Structure and Style-Preparation –Presentation; Delivering a Presentation. Making the self-presentable: Dressing sense, clear voice, planning, analyzing and structuring managing body language and emotion .								
Unit-V: Meetings, Resume, GDs, Emotional Intelligence Importance of Business Meetings; Different Types of Business Meetings; Conducting Meetings; Common Mistakes Made at Meetings. Overcoming mistakes in meeting Employment Communication. Contents of Good Resume; Different Types of Resumes; Reason for a Cover Letter to Apply for a Job-Format of Cover Letter; Different Types of Cover Letters. Understanding the nature of discussion, Difference between debate and discussion, Ways to form and present the arguments, Ways to defend. Understanding individual nature by ‘Johari Window’ model, Encouraging the fellow participants, Making communication more friendly by using ‘Knapp’s relationship escalation’ model, convincing others by using rhetorics.

GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA II SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB203	BUSINESS ENVIRONMENT	3	0	0	3

Course Description

The business environment in India is undergoing a dynamic change; what was looked upon as an under developed nation is now regarded as a potential economic power and emerged as one of the emerging nation of the world. With the eruption digitization and e-commerce its service industry is providing multinational companies with unparalleled opportunities. With liberalization, privatization and further on globalization India's business world is occupying a place in almost all major sectors of the world economy. In this context, the nature and extent of the role of the state is undergoing fundamental changes with digitization and financial inclusion.

Course Objectives

1	Sensitizing the students to the value implications of environment on business, in general.
2	The main drive of this course addresses structural changes, external environmental changes, planning and policies of the state, economic trends, information technology and its impact.
3	To bring awareness on major legal environment concepts and acts in addition to other environments.

Course Outcomes
(Upon successful completion of this course, students should be able to)

CO1	Students would be acquainted with business objectives, dynamics of business and environment, various types of business environment and its analysis.
CO2	To make the students to understand different facets of Business Environment in Indian context.
CO3	To enhance students ability to understand economic planning and industrial policy in India.
CO4	To sensitize students about monetary and fiscal policy in India and its impact on business.
CO5	To enable the student to understand social responsibility of business.
CO6	To create awareness among the students about corporate governance.

CO-PO & PSO Mapping (Articulation Matrix)

COs	POs					PSOs

Justification of the Mapping:

0=No Relevance; 1=Low Relevance; 2=Medium Relevance; 3=High Relevance

Syllabus

Unit-I: Business Environment
Nature, scope and objectives of business, environment of business description, internal environment and external environment, Political environment, Economic environment, Social Environment,

Technological environment, Ecological & Legal environment, Macro environment and Micro environment.

Unit-II: Economic Planning and Industrial Policy

Economic Planning impact on business environment Meaning and Objectives of Industrial Policies, Need for Industrial Policies, Salient features of 1948, 1956, 1991 Industrial Policies, Closed economy and open economy, Liberalization, Privatization and Globalization, NITI AAYOG and its objectives, Ease of doing business, FERA- FEMA- Competition Act.

Unit-III: Monetary and Fiscal Policy

Monetary Policy and its objectives, CRR and SLR, Money Supply, instruments of money supply, RBI's Monetary Policy Measures, Fiscal Policy and its objectives, Techniques of Fiscal Policy, Impact of Monetary and Fiscal Policy on business environment, Central and States Budget, finances of the central and state budgets.

Unit-IV: Business and Social Environment

Business and Society- objectives and importance of business, Professionalization of Business, Ethics in business-Impact of cultural factors in business, Social Responsibility of Business, giving back to the society-Social involvement, social audit, Companies Act 2013 and CSR.

Unit-V: Corporate Governance

Description of Corporate Governance-reasons for the growing demand for corporate governance-importance of corporate governance- prerequisites; regulatory and voluntary actions; recommendations of Birla Committee; legal environment of corporate governance in India.

SCHOOL OF MANAGEMENT STUDIES
GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA II SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB204	BUSINESS STATISTICS	3	0	0	3

Course Description

This course provides an introduction to statistical methods and their applications in the business environment. Students will learn essential concepts in descriptive statistics, probability theory, and inferential statistics. Key topics include data collection and presentation, measures of central tendency and variability, hypothesis testing, regression analysis, and the use of statistical software for data analysis. The course emphasizes the interpretation and communication of statistical results, enabling students to make informed business decisions based on quantitative data. Practical applications are highlighted through case studies and real-world examples, fostering a deeper understanding of how statistics support strategic planning, marketing analysis, and financial forecasting. By the end of the course, students will be equipped with the analytical skills necessary to apply statistical techniques effectively in various business contexts.

Course Objectives

1	Create tables and graphs to format, organize, and interpret data; summarize and present data
2	Calculate and analyse numerical descriptive measures for a given data and set measures of central tendency and variation
3	Calculate the mean and variance of a discrete distribution
4	Apply linear regression analysis for estimation and inference; interpret resulting data
5	Apply Time series analysis for estimation and inference; interpret resulting data
6	Use statistical techniques to analyse and interpret data from business, social science, and science

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to produce appropriate graphical and numerical descriptive statistics for different types of data.
CO2	Able to develop frequency distribution and calculate central tendency measures.
CO3	Able to summarize and analyse statistical data to solve practical business related problems through dispersion measures.
CO4	Apply statistical methods like correlation, regression analysis in analysing, interpreting experimental data.
CO5	Able to use Time series Analysis in management decisions.
CO6	Able to summarizing data, Evaluate and to make data-driven decisions

CO-PO & PSO Mapping (Articulation Matrix)

COs	POs					PSOs		
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	PSO3

CO6	3	3	0	1	3	1	2	2

AVG	3.00	3.00	0.00	1.00	2.33	0.83	2.00	2.00
Justification of the Mapping: 0=No Relevance; 1=Low Relevance; 2=Medium Relevance; 3=High Relevance								
Syllabus								
Unit-I: Introduction Statistics as a subject, functions, Importance and limitations of statistics; Census and sample investigation; Descriptive and inferential statistics. Classification of data, Tabulation, Graphical Presentation, Types of Diagram.								
Unit-II: Measures of Central Tendency Definition and utility; Characteristics of a good average; Series of Data; Arithmetic Mean; Geometric Mean; Harmonic Mean; Median; Mode; Relation between Mean, Median and Mode; Choice of a suitable measure of central tendency.								
Unit-III: Measures of Dispersion Meaning and objectives of Dispersion; different measures of Dispersion - Range, Quartile deviation, Mean deviation, Mean Absolute Deviation, Standard Deviation; Comparison of the different measures of dispersion. Measures of relative dispersion- Coefficient of Variation, combined mean and standard deviation; Skewness and Kurtosis; Skewness; Measures of Skewness; Kurtosis and its measures.								
Unit-IV: Correlation and Regression Correlation Analysis, Meaning of correlation, Karl Pearson's coefficient of linear correlation, Properties of the correlation coefficient, Advantages and limitations of the coefficient of correlation, Rank correlation, Spearman's Rank correlation coefficient. Regression Analysis: Two lines of regression, Correlation coefficient and the two Regression Coefficients								
Unit-V: Time Series Analysis Definition, Components of Time Series, Measurement of Trend: Least Square Method, Moving Average Method.

SCHOOL OF MANAGEMENT STUDIES
GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA II SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB205	ORGANISATIONAL BEHAVIOUR	3	0	0	3

Course Description

Practicing managers have long understood the importance of interpersonal skills to managerial effectiveness. Till about three decades ago, most business schools focused on the functional aspects of management specifically finance, accounting and quantitative techniques. This course's essential focus is on gaining an in depth understanding of the impact of the organization structure, organizational culture and change on individual behaviour at the workplace. Gaining an understanding and a perspective on these global implications should result in beneficial results in terms of managerial effectiveness and performance.

Course Objectives

1	To familiarize the students with the nature of human behaviour in corporate and other organisations.
2	To explain the stages of group development and group decision making techniques.
3	To demonstrate role of leadership in developing the employees and organisations.
4	To explain the strategies of high performing cultures through creating best organisational cultures.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to demonstrate the applicability of the concept of organizational behavior to understand the behavior of people in the organization.
CO2	Able to demonstrate the applicability of analysing the complexities associated with management of individual behavior in the organization.
CO3	Able to analyse the behaviour of groups in organizations in terms of the key factors that influence organization behaviour.
CO4	Able to examine the work styles, communication preferences and employee traits that can help to create effective work teams in the organisation.
CO5	Able to understand organisational culture in various diversified sectors.
CO6	Able to develop practical insights and problem solving capabilities for effectively managing the Organizational processes.

CO-PO & PSO Mapping (Articulation Matrix)

COs	POs					PSOs		
	PO1	PO2	PO3	PO4	PO5	PSO1	PSO2	PSO3

Justification of the Mapping:

0=No Relevance; 1=Low Relevance; 2=Medium Relevance; 3=High Relevance

Syllabus

Unit-I: Introduction to Organisational behaviour

Introduction, Nature and Importance of Organizational Behaviour, Management Functions, Roles and Skills – People Skills.

Unit-II: Individual Behaviour

Foundations of Individual Behaviour, The Perception process, Factors, Person Perception, Learning: Theories of Learning, Principles of Learning
Motivation: Primary and General Motives
Theories of Motivation: Maslow, Herzberg, Equity Theory, Goal-Setting Theory – Expectancy Theory

Unit-III: Group Behaviour

Foundations of Group Behavior - Nature of Groups – Structure, Types, Stages of Group Development- Group Decision-Making - Groups vs. Individual, Groupthink, Group shift, Group Decision-Making Techniques.

Unit-IV: Leadership Theories and Teams

Managing Group Behavior - Leadership – Nature and Importance, Theories-Trait theories, Behavioral Theories, Contingency Theories - Understanding Work Teams – Nature of Teams, Types of Teams, Effectiveness of Teams, Team Building - Conflict – Intra-personal and Interpersonal Conflict.

Unit-V: Organisational Culture

Foundations of Organizational Behaviour - Organizational Structure – Work Specialization, Departmentalization - Span of Management, - Organizational Culture: Nature – Creating and Maintaining a Culture.

GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA II SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB206	COST & MANAGEMENT ACCOUNTING	3	0	0	3

Course Description

Cost Accounting was merely considered to be a technique for ascertainment of cost of products or services on the basis of historical data. It is concerned with recording, classifying and summarizing costs for determination of costs of products or services, planning, controlling and reducing such costs and furnishing of information to management for decision-making. Management Accounting is concerned as the provision of information to people within the organization to help them make better decision

Course Objectives

1	To analyse the importance of budgeting and the impact on Cost Accounting.
2	To provide understanding of essential terms, concepts of cost, various methods and techniques of costing and understanding of management accounting concepts.
3	To develop skills in students to analyse various tactical decisions with the help of marginal costing techniques for better decision making.
4	To enhance the abilities of learners to develop the concept of Cost and management accounting and its significance in the business.
5	To enable the learners to understand, develop and apply the techniques of costing in the decision making in the business corporates.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to understand and differentiate between Cost accounting and management accounting.
CO2	Able to evaluate the costs and benefits of different conventional and contemporary costing systems.
CO3	Able to prepare cost sheet, quotations, and tenders to organization for different works.
CO4	Able to analyse cost-volume-profit techniques to determine optimal managerial decisions.
CO5	Able to estimate the break-even point of the firm.
CO6	Able to prepare plans and budgets and analyse variances from standard cost to pinpoint areas that need control.

CO-PO & PSO Mapping (Articulation Matrix)

Justification of the Mapping:

0=No Relevance; 1=Low Relevance; 2=Medium Relevance; 3=High Relevance

Syllabus

Unit-I: Cost and Management Accounting

Introduction and significance of cost accounting and management accounting-Nature and Scope of Cost Accounting and Management Accounting – Importance of cost center and cost unit - Cost Accounting vs. Management Accounting vs. Financial Accounting.

Unit-II: Cost Concepts

Elements of Different Costs: Direct and Indirect - Material Cost- Issue of Materials- Pricing Methods (LIFO, FIFO, Simple and Weighted Average) - Labour cost- Direct and Indirect Labour Cost- Systems of Payment of Wages (Halsey & Rowan Plans) - Overheads-Classification, Allocation and Apportionment of Overheads.

Unit-III: Cost Sheet

Preparation of Cost Sheet: Classification of costs – prime cost – works cost – cost of production – cost of sales – Profit Margin - Preparation of Cost sheet for special work orders.

Unit-IV: Managerial Applications of Cost-Volume-Profit and Break Even Analysis

Analysis and Classification of different Costs- Fixed Cost- Variable Cost- incremental Cost- Differential Costs- Opportunity Cost and Cost-Volume-Profit Analysis- Margin of Sales and Break Even Point- Decisions involving alternative choices - Make or Buy Decision- determination of sales mix - addition or deletion of a product.

Unit-V: Budgeting

Introduction to Budget, Budgeting and Budgetary control – Essentials of a Budgetary Control- Master Budget- Flexible Budget- Production and Sales Budget- Zero Based Budgeting.

BBA III SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB302	E-COMMERCE	3	0	0	3

Course Description

By the help of the flexibility offered by computer networks and the availability of the Internet, Ecommerce develops on traditional commerce. E-commerce creates new opportunities for performing profitable activities online. It promotes easier cooperation between different groups: businesses sharing information to improve customer relations; companies working together to design and build new products/services; or multinational company sharing information for a major marketing campaign.

Course Objectives

1	To make the students understand the various concepts related to Electronic Business.
2	To enable them to understand and exploit its role in providing strategic advantage.
3	To understand the various application issues of E-commerce like internet infrastructure, security over internet, payment system and various online strategies of E-commerce.
4	To expose the students to electronic modes of commercial operations.
5	To make the students understands need of M-Commerce.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to identify the anatomy of E-commerce.
CO2	Able to categorize different electronic payment system.
CO3	Able to analyse how social Commerce is playing a vital role for the promotion of a business.
CO4	Able to analyse the various marketing strategies for an online business.
CO5	Able to design strategies for E-commerce catalogues.
CO6	Able to analyse the concept and usage of M-Commerce.

CO-PO & PSO Mapping (Articulation Matrix)

Odisha, Gunupur
BBA III SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB304	FINANCIAL MANAGEMENT	3	0	0	3

Course Description

This course equips students with comprehensive knowledge and skills essential for effective management of financial resources in business contexts. Covering fundamental concepts like time value of money and risk-return analysis, the course delves into financial planning, budgeting, and forecasting techniques crucial for efficient resource allocation. Students learn capital budgeting methods such as NPV and IRR for investment decision-making, while also exploring the role of financial markets, institutions, and ethical considerations in financial management. Practical skills in financial statement analysis, working capital management, and risk mitigation strategies are emphasized through case studies and real-world applications, preparing graduates for careers as financial analysts, managers, or consultants in diverse industries.

Course Objectives

1	To develop a foundational understanding of financial principles and theories.
2	To gain proficiency in capital budgeting and investment decision-making.
3	To understand concepts of cost of capital, leverage analysis, capital structure and dividend theories and identify courses of action in financial environment that would result in maximization of wealth of an organization.
4	To understand basic concepts of financial management and their application in investment, financing and dividend decisions.
5	To manage working capital and optimize liquidity.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to apply financial principles to real-world business scenarios.
CO2	Able to compete in evaluating investment opportunities using capital budgeting techniques.
CO3	Able to apply capital structure decisions and their implications for organizational finance.
CO4	Able to familiar with dividend policy and its impact on shareholder value.
CO5	Able to manage working capital effectively.
CO6	Able to develop skill in analysing financial statements and interpreting financial data.

BBA III SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB305	HUMAN RESOURCE MANAGEMENT	3	0	0	3

Course Description

The general purpose of this course is to familiarize students with the basic principles and techniques of HRM. The course takes a practical view that integrates the contributions of the behavioural sciences with the technical aspects of implementing the HR function in the real world. This basic understanding of HRM is essential for the student when he enters the diverse workplaces. To become a successful manager, it is imperative to understand human sensitivities and factors that motivate individuals. Human Resource Management course provides the basic tools required as an HR professional in an organisation.

Course Objectives

1	Comprehend in depth the theoretical framework and the basic principles of HRM.
2	Comprehend in depth functions of HRM (Job analysis, manpower planning, and recruitment, selection, on boarding, training & development, appraisal, compensation).
3	To understand the key factors influencing compensation and different employee benefits and services
4	To know how to maintain the industrial relation and to understand the settlement machineries for industrial disputes.
5	Apply the principles and techniques of HRM gained through this course to the discussion of major personnel challenges and the solution of typical case problems.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to identify the fundamentals, evolution, function & challenges of HRM.
CO2	Able to explore the role of HRM in procurement.
CO3	Able to evaluate the development of human Resources, methods of appraisal and perceptual errors and employee separation.
CO4	Able to analyse the basic factors in designing the compensation.
CO5	Able to familiarise the concepts of collective bargaining, Trade union & Industrial dispute.
CO6	Able to distinguish the purposes and relevance.

BBA III SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB306	MANAGEMENT INFORMATION SYSTEMS & ERP	3	0	0	3

Course Description

This course provides an in-depth understanding of Management Information Systems (MIS) and Enterprise Resource Planning (ERP) systems, focusing on their role in supporting business operations, decision-making, and strategic planning. Students will learn how these systems integrate various business processes and facilitate the flow of information across an organization.

Course Objectives

1	Gain a comprehensive understanding of the components and functions of Management Information Systems.
2	Learn about ERP systems, their architecture, and how they integrate various business functions.
3	Understand how ERP systems streamline business processes and improve efficiency.
4	Explore how MIS and ERP systems support decision-making at different organizational levels.
5	Analyse real-world case studies to understand the practical application of MIS and ERP systems.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Able to relate the basic concepts and technologies used in the field of management information systems.
CO2	Able to compare the processes of developing and implementing information systems.
CO3	Able to outline the role of the ethical, social, and security issues of information systems.
CO4	Able to evaluate the information systems in terms of their contribution towards improved decision making and optimum use of organizational resources.
CO5	Able to explain the tools and techniques for information systems design and implementation and apply them appropriately to take leverage of enterprise systems for enhancing the effectiveness of decision making.
CO6	Able to translate the role of information systems in organizations, the strategic management processes, with the implications for the management

BBA IV SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB401	RESEARCH METHODOLOGY	3	0	0	3

Course Description

Research methodology is the systematic and scientific method of how to review and research a topic. It starts with identification of the problem and continues with sample design, data collection, analysis, and report. It is extensively used to find a solution to a problem and enhance knowledge. Continuous growth is one of the key challenges for business, which needs innovative ideas and solutions to stagnation in growth. Research is a valuable tool for businesses to identify potential avenues for growth and solutions to problems. Understanding the methodology to be adopted when researching is, therefore, very crucial for businesses.

Course Objectives

1	To understand the formulation of research problem and hypotheses.
2	To learn critical analysis, problem solving and research skills.
3	To enable students to understand the rationale for using a particular qualitative and quantitative research method.
4	To enable students to understand various methods to select appropriate research designs and methods to investigate their chosen research problems.
5	To become familiar with the processes needed to develop, report, and analyse business data.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Formulate of research problems and developments of research outline.
CO2	Develop a scientific knowledge on addressing various management decision Process through business research.
CO3	Demonstrate their skill to apply different research methods in a scientific manner to assist the management for proper decisions on functional aspects.
CO4	Understand research hypothesis and research design for business studies
CO5	Acquire knowledge in generating and handling data with the help of statistical software to draw meaningful conclusions and suitable suggestions.
CO6	Conduct field-based surveys either for problem identification or problem solving in management issues.

Odisha, Gunupur
BBA IV SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB402	FUNDAMENTALS OF ENTREPRENEURSHIP	3	0	0	3

Course Description

This course introduces students to the essential principles and practices of starting and managing a successful business. This course covers key topics such as opportunity recognition, market analysis, business planning, financing, and marketing strategies. Through interactive discussions, students will develop critical thinking and problem-solving skills while gaining insights into the entrepreneurial mind-set. By the end of the course, students will be equipped with the foundational knowledge necessary to launch and sustain their own ventures in today's dynamic economic landscape.

Course Objectives

- 1 Understand Entrepreneurship and its role in society.
- 2 Know the evolution of Entrepreneurship.
- 3 Understand the mind-set of entrepreneurs.
- 4 Gain knowledge about business Idea Generation.
- 5 Apprehend about EDP Programmes.

Course Outcomes

(Upon successful completion of this course, students should be able to)

- | | |
|-----|---|
| CO1 | Apply key entrepreneurial concepts and frameworks to real-world business scenarios. |
| CO2 | Develop a viable business plan and pitch it effectively to potential investors. |
| CO3 | Understand the challenges and opportunities of entrepreneurship and formulate strategies to address them. |
| CO4 | Demonstrate the ability to conduct market research and competitive analysis. |
| CO5 | Analyse and utilize various funding options and financial management practices. |
| CO6 | Appraise the entrepreneurship process in the family business and social enterprise. |

SCHOOL OF MANAGEMENT STUDIES
GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA IV SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB403	RURAL MANAGEMENT	3	0	0	3

Course Description

This course explores the unique challenges and opportunities within rural economies, focusing on sustainable development and effective resource management. This course examines key aspects such as agricultural practices, rural entrepreneurship, community development, and the impact of policy and technology on rural livelihoods. Through a blend of theoretical frameworks and practical case studies, students will gain insights into rural markets, stakeholder engagement, and the role of organizations in fostering economic growth and social well-being in rural areas. By the end of the course, students will be equipped with the skills to design and implement effective strategies that promote rural development and improve the quality of life for rural communities.

Course Objectives

1	Understanding the frameworks and models for rural development and their application in different contexts.
2	Techniques for effectively engaging with rural communities and fostering local participation.
3	Strategies for enhancing economic opportunities, including entrepreneurship, small business development, and local industry support.
4	Exploring the social and cultural aspects of rural life and their influence on development practices.
5	Analysing rural policies, governance structures, and their impact on rural development initiatives.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Define the rural areas, rural economy and development and issues or Rural Development in general and address them through various development strategies.
CO2	Acquaint the knowledge on theories of development, social political structure, economic structure, economic.
CO3	Explain the rural local self-governance namely Panchayat Raj Institutions and its role in planning and development of rural areas
CO4	Identify the importance of empowerment of women and community participation for micro-finance and governance.
CO5	Elucidate the importance of conservation of resources, ecology and environment in rural areas for sustainable rural development.
CO6	Assess and address the unique challenges faced by rural communities through effective management practices.

BBA IV SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB404	INTRODUCTION TO BFSI	3	0	0	3

Course Description

This course provides a comprehensive overview of the key concepts and practices within these interconnected sectors. The course covers the fundamental functions of banking, the role of financial institutions in the economy, and the principles of risk management and insurance. Students will explore topics such as investment strategies, regulatory frameworks, financial instruments, and the impact of technology on service delivery. Students will develop a deep understanding of how these sectors operate, enabling them to navigate the complexities of financial markets and make informed decisions in their professional careers.

Course Objectives

1	To understand the role and importance of banks and insurance companies in the financial system.
2	To learn about various banking operations, products, and services.
3	To gain insights into the principles and practices of insurance and analyse the regulatory environment governing banking and insurance sectors.
4	To develop an understanding of risk management in banking and insurance.
5	To explore current trends and challenges in the banking and insurance industries.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Adhere to banking operations and insurance principles to make informed financial decisions.
CO2	Implement risk management strategies to mitigate financial risks inherent in banking and insurance activities.
CO3	Evaluate financial products and services offered by banks and insurance companies to meet customer needs.
CO4	Proficient in regulatory compliance requirements and ethical considerations in banking and insurance management.
CO5	Utilize financial analysis skills to assess the performance and stability of banking and insurance institutions.
CO6	Adapt technological advancements and global trends shaping the banking and insurance industries for strategic decision-making.

CO-PO & PSO Mapping (Articulation Matrix)

GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY UNIVERSITY
Odisha, Gunupur
BBA IV SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB405	PRODUCTION AND OPERATION MANAGEMENT	3	0	0	3

Course Description

This course focuses on the strategies and practices that drive efficient production and service delivery in organizations. This course covers key topics such as process design, supply chain management, quality control, and inventory management, equipping students with the tools to optimize operations and enhance productivity. Students will learn to analyse operational challenges, implement improvement methodologies, and leverage technology to streamline processes. By the end of the course, students will have the skills necessary to contribute to effective decision-making and operational excellence in a variety of business environments.

Course Objectives

1	To understand Industry 4.0 and integrate technology in smart production.
2	To apply various production and operations design decisions and relate it to the overall strategies of organizations.
3	To obtain an understanding of quality management practices to enhance the organizational effectiveness.
4	To understand the roles on inventories and basics of managing inventories in various demand settings.
5	To introduce concepts of operations management in an organisation and expose to analytical methods.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Develop and apply strategies to optimize production and operations.
CO2	Design and analyse production processes for efficiency and effectiveness
CO3	Understand basics and techniques of Production Planning and Control.
CO4	Apply location decision models.
CO5	Apply work study for the improvement of the productivity.
CO6	Apply various inventory controlling and Quality controlling techniques into practice.

CO-PO & PSO Mapping (Articulation Matrix)

Justification of the Mapping:

0=No Relevance; 1=Low Relevance; 2=Medium Relevance; 3=High Relevance

Syllabus

Unit-I: Production and Operations Management

Production and Operation Functions - Manufacturing Systems - Differences between Manufacturing and Service Operations - Functions of Production and Operations Manager.

Unit-II: Production Planning and Control

Objectives & Importance of PPC, Project Management: Concept and characteristics of a project, Project life cycle, Project Management Techniques, Assumption and analysis of CPM and PERT; Sequencing: Johnson's Job Sequencing, $2 \times M$ Machines, $M \times 2$ Machines, $M \times N$ Machines, Gantt Charts.

Unit-III: Facility Location

Strategic Importance of facility Location, Factors Affecting Plant Location; Location Theories and Models: Factor Rating Method, Weighted Factor Rating Method, Centre of Gravity; Aggregate Planning: Role & Need for Aggregate Planning, Aggregate Planning Strategies.

Unit-IV: Productivity

Factors Affecting Productivity - Job Design - Process Flow Charts - Methods Study - Work Measurement.

Unit-V: Materials Management and Quality Management

Costs Associated with Inventory - Economic Order Quantity - ABC Analysis - Just in-time Production. Quality Management: Acceptance Sampling - Control Charts - Quality Circle.

BBA IV SEMESTER (AR23)

Course Code	Course Title	L	T	P	C
BB406	BASICS OF BUSINESS ANALYTICS	3	0	0	3

Course Description

This course explores the critical techniques and tools used to interpret data and make informed business decisions. This course delves into the fundamentals of data analysis, statistical methods, and predictive modelling, equipping students with the skills to analyse complex datasets and extract actionable insights. Key topics include data visualization, decision-making frameworks, and the application of analytics in areas such as marketing, finance, and operations. Through practical exercises, and software tools, students will learn how to transform data into strategic recommendations, enhance business performance, and drive data-driven decision-making. Ideal for professionals and managers aiming to leverage analytics for competitive advantage, this course provides the knowledge needed to harness the power of data in today's business landscape.

Course Objectives

1	To gain an understanding of how managers use business analytics to formulate and solve business problems and to support managerial decision making.
2	To equip students with the ability to solve complex problems using different analytical tools and techniques in business
3	To learn how these analytics are useful in contemporary fields..
4	To develop practical exposure on TABLEAU for data visualisation.
5	To develop practical exposure on R Programming for data analysis.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Apply appropriate analytical methods to find solutions to business problems that achieve stated objective.
CO2	Articulate the meaning and importance of business analytics and differentiate it from related concepts like business intelligence and data mining.
CO3	Compare descriptive and predictive analytical techniques based on their application and effectiveness in various business contexts.
CO4	Explore Domain-Specific Analytics and discuss their implications for business strategies.
CO5	Demonstrate proficiency in using Tableau for data visualization, including importing data and connecting to real-time databases.
CO6	Utilize R for conducting statistical analyses, including correlation and regression analysis, to derive meaningful insights from data.

BBA V Semester (AR23)

Course Code	Course Title	L	T	P	C
BB500	SIP PRESENTATION & SUBMISSION	3	0	0	3

Course Description

This is designed to guide students in effectively showcasing their internship experiences and project outcomes. This course emphasizes the development of presentation skills, professional communication, and critical analysis of real-world business challenges. Students will prepare a comprehensive report summarizing their internship projects, highlighting key learnings, methodologies, and contributions to the organization. Through peer reviews and faculty feedback, students will refine their presentations and enhance their ability to articulate their experiences and insights. By the end of the course, students will be equipped to confidently present their work, demonstrating their practical skills and readiness for future professional endeavors.

Course Objectives

1	To transfer their analytical, integrative, team skills honed in the classroom to the workplace.
2	To understand the complexities of the corporate world first hand.
3	To focus on a narrow problem within a selected topic/field typically a micro theme and to facilitate an in-depth study using quantitative/qualitative measurement tools to organize and analyse data, intensively focusing on the area to arrive at reasoned conclusions about the issue or problem.
4	To identify opportunities for networking with people in Industry/Organisations/Corporates.
5	To aim for pre-placement offers where feasible/appropriate.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Developing independent thinking on the subject and enables to gain practical experience in research methodology.
CO2	Work effectively as an individual and member of the team to solve managerial problems.
CO3	Apply the theoretical concepts learned in the programme to real-life situations.
CO4	Create a clear and organised project report that effectively communicates research findings and conclusions.
CO5	Apply professional presentation techniques to deliver a compelling and informative project report.
CO6	Compose and present detailed project report of his/ her work and defend effectively.

Syllabus

Duration of SIP:

SIP is scheduled during the summer between the second and the third year. It generally spans for six weeks. The duration may be extended beyond six weeks, but in no case should exceed eight weeks. Any extension for SIP duration would be subject to the decision of the Dean/HoD.

Initial Stage:

1. Each student will be allotted a faculty member as guide based on the student specialisation. Any problem/assistance related to SIP faced/needed by the student must be report to his/her guide only.
2. Each student must submit an Initial Internship Report (IIR) on second week of post starting of internship to his/her guide.

During SIP:

1. Students will abide by the applicable policies and norms of the Organisation during the period of internship.
2. The students are expected to first understand the organization and the industry/field in which the organization is operating, in order to make a meaningful difference with the quality of his/her work
3. The organization has the right to terminate students from the internship at any time due to inappropriate behaviour and/or non-cooperation with the internship process and/or continued non-performance in assignment or any other reason the organization deems fit. Therefore, it is strictly advising to all interns/students that do internship with utmost seriousness.
4. The students are expected to concentrate on the specific topic of study, its objectives, its rationale, and adopt a methodology and identify a suitable analysis procedure for the completion of the study.
5. It is expected that all students will adhere to the proper standards of intellectual honesty and professional propriety in their conduct.
6. Students are advised not to do anything directly or indirectly which may create a poor impression about the University. Any student found disregarding any of the norms would be liable for disciplinary action, including rustication depending upon the severity of the offence.
7. The students should abide by the dress code and other professional norms of their Internship organisation. Punctuality is a quality that is appreciated by professionals across all organizations.
8. The students should ensure that the data and other information used in the study report is obtained with the permission of the organisation concerned.
9. Each student must submit an Internship Progress Report (IPR) on every fortnight to his/her guide.

Completion Stage

1. At the end of the internship, the intern shall prepare Internship Completion Report (ICR).
2. The intern may be required to make a presentation to the Industry Mentor (IM).
3. As proof of completion of the internship, the intern will obtain an Internship Completion Certificate from the organization/company/IM.

After completion

1. The intern shall submit the SIP Report (including completion certificate) preliminary copy to the guide within one week of commencement of the ensuing semester.
2. The intern must follow five stages before the Project Report Committee (PRC):
 - Stage 1: First presentation at the time of Cycle Test I.
 - Stage 2: Second Presentation at the time of Cycle Test II.
 - Stage 3: Project Report Submission (three sets of hardcopy and one softcopy) before commencement of External Exams.

Faculty Supervision, Reporting & Evaluation

1. The guides are to ensure that the interns can deliver as expected and explore the possibility of converting the SIP opportunity into a long-lasting association, collaborations for research, executive education, and consultancy projects etc.
2. During SIP, several interactions between the guide and the organizations/companies are expected. These can be conducted through multiple modes such as email, phone, video, or in-person as may be expedient/appropriate. Guide can coordinate with IM and assigned student for the same.
3. During the internship, the intern may seek telephonic/email/online platform interactions with guide to receive support if necessary.
4. Completion of the summer internship is a degree-awarding requirement for the MBA program of School of Management Studies, Gandhi Institute of Engineering & Technology University. For any foreseeable or unforeseeable reasons, if a student is unable to complete the internship in the intended year, he or she should be allowed to complete the internship requirements at the end of the requisite course work of the program he or she has enrolled for. It should be noted that as SIP is a core course, non-completion of SIP would entail no degree.
5. Absenteeism, premature abandonment, non-submission of reports, misconduct at the workplace, unprofessional behaviour, etc. are non-exhaustive examples of serious misconduct during the program. In case the student intern is found to have indulged in serious misconduct, the student intern is liable for any of the punitive actions, including cancellation of internship, withdrawal of final placement assistance, or rustication from the program/university, depending on the severity of inappropriate conduct.

Evaluation of SIP

The internship evaluation will have three components:

1. **Continuous Assessment (During SIP):** Every fortnight student will have to submit a progress report to his/her guide as per template. All these reports will be assessed by guide for content and compliance.
2. **Industry Mentor Assessment (On completion of SIP):** The Industry Mentor will submit in writing/discuss with corresponding guide his/her evaluation of the student in terms of exceeding or at least meeting expectation.
3. **Final Assessment (After completion of SIP):** A student will be required to submit a detailed project report to his/her guide and appear for an oral presentation before a panel to compile his/her learnings from the internship. The guide will share report format with the interns.

Project Report Presentation Marks Summary

Stage	Coverage of Presentation	Marks
I	• Title of the Project • Need for the Study • Objectives of the Study • Scope of the Study • Hypothesis of the Study • Research Methodology & Statistical Tools • Theoretical Framework • Company Profile • Industry Profile • Limitations	30
II	• Data Analysis & Interpretation • Findings, Suggestions and Conclusion	30
III	Project Submission	40
Total Marks for Evaluation		100

FORMAT FOR PROJECT REPORT SUBMISSION

The final report is comprised of the following:

1. Cover Page
2. Certificates
 - Department Permission Letter
 - Company Permission Letter
 - SIP Completion Letter from Company
3. Declaration
4. Acknowledgements
5. Executive Summary in 250 words
6. Index/Table of Contents
7. List of Tables/Figures/Charts/Symbols
8. List of Abbreviations
9. Chapter 1: Introduction
 - Introduction (in Single Paragraph)
 - Need for the Study (point wise in number format)
 - Objectives of the Study (point wise in number format, Max: 3)
 - Scope of the Study (point wise in number format)
 - Research Methodology
 - Sample Design (in Single Paragraph)
 - Sample Type (in Single Paragraph)
 - Sample Size (in Single Paragraph)
 - Statistical Tools used (type wise in bullet format)
 - Data Collection
 - Which type of data collection you chose and why?
 - Limitations (point wise in number format)
10. Chapter 2: Industry and Company Profile
 - Industry Profile
 - Brief profile of the Industry including its current status from which the company belongs
 - Company Profile
 - Name of the firm/company (its complete address).
 - Company's vision & mission.
 - Focus on nature of the Organisation and its business (service/production/trading etc.)
 - Size (in terms of manpower & turnover) of organization.
 - Organization structure of the company.
 - Market share & position of the company in the industry.
 - Awards and Recognitions
11. Chapter 3: Theoretical Framework
 - Your chosen topic introduction.
 - Importance of the chosen topic.
 - Various strategies/types/categories/etc. of your chosen topic.
 - Mention any other relevant information on your chosen topic.
12. Chapter 4: Data Analysis and Interpretation
 - Show your raw data in the form of tables/charts/figures/diagrams/etc.
 - Show the analysis of your collected data using various mathematical and statistical methods.
 - Write a brief interpretation on each table/chart/figure/diagram/etc.
13. Chapter 5: Findings, Suggestions/Recommendations and Conclusion
 - Present the facts based on your analysis (point wise in number format)
 - Suggest alternative solutions to the identified problems (point wise in number format)
 - Prepare a brief conclusion (in single paragraph)

14. References/ Bibliography (APA Style or Harvard Style)
15. Appendices
 - Questionnaires
 - Any Supporting Data

SPECIFICATIONS FOR BODY OF THE PROJECT REPORT AND VIVA VOCE

Following aspects must be adhered to as given in while compiling the body of report

1. **Page Size:** Good quality white A4 size executive bond paper should be used for typing and duplication.
2. **Chapter/Para Numbering:** The chapters are to be numbered as Chapter-1, Chapter-2 etc. The heading/title of the chapter is to appear below the chapter number in uppercase. Paragraphs are to be numbered as 1,2,3 etc in every chapter separately.
3. **Page Specifications**
 - a. Left Margin : 1.25 inch
 - b. Right Margin : 1.25 inch
 - c. Top Margin : 1 inch
 - d. Bottom Margin : 1 inch
4. **Page Numbers:** All text pages starting from Body of the Project Report as well as program source code listings should be numbered at the bottom centre of the pages.
5. **Normal Body Text**
 - a. Font Size: 12, Times New Roman, 1.5 Spacing, Single Side Writing.
 - b. Paragraphs Heading Font Size: 12, Times New Roman, Bold (Capitalized Each Word)
 - c. Page/Title Font Size: 14

6. **Table/Charts/Diagrams/Figure Number:** Follow standard format

7. **Binding & Colour Code of the Report**

- a. **Hard Bound Report.**
- b. **Background of the cover page :** Black/White.
- c. **Colour of Letters :** Gold in case of Black background/Black in case of white background.

Course Code	Course Title	L	T	P	C
BB603	WORKING CAPITAL MANAGEMENT	3	0	0	3

Course Description

This course provides a comprehensive understanding of working capital management, essential for maintaining a company's operational efficiency and financial stability. Students will explore key concepts such as cash flow management, inventory control, accounts receivable, and payable strategies. Students will learn how to optimise working capital to enhance liquidity, reduce costs, and improve overall business performance. The course emphasizes the importance of strategic decision-making and financial analysis, equipping students with the tools needed to navigate the complexities of working capital in today's dynamic business environment.

Course Objectives

1	To understand the concepts of and need for working capital.
2	To apply suitable cash forecasting model.
3	To construct working capital estimation statements.
4	To evaluate inventory control methods.
5	To propose a suitable plan for sourcing working capital finance.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Analyse the components of working capital and their impact on overall financial health and liquidity.
CO2	Develop effective cash flow management strategies to ensure optimal liquidity for operations.
CO3	Evaluate and apply inventory management techniques to balance supply and demand efficiently.
CO4	Assess best practices for managing accounts receivable to improve cash collection cycles.
CO5	Formulate strategies for optimizing accounts payable to maintain healthy supplier relationships while managing cash outflows.
CO6	Utilise financial analysis tools and metrics to monitor and enhance working capital performance effectively.

Course Code	Course Title	L	T	P	C
BB604	DIRECT TAXATION	3	0	0	3

Course Description

This course offers an exploration of direct taxation laws and practices in India, focusing on the Income Tax Act and its application. Students will gain a comprehensive understanding of key concepts, including taxable income, deductions, exemptions, and the various tax rates applicable to individuals and businesses. The course will cover essential topics such as tax planning, assessment procedures, and compliance requirements, as well as recent amendments and judicial interpretations. Through practical examples, students will develop the skills needed to navigate the complexities of direct taxation, enabling them to make informed decisions in personal and professional financial contexts.

Course Objectives

1	Understand the foundational principles and provisions of the Income Tax Act and its relevance in India.
2	Understand various sources of income and their tax implications for individuals and businesses.
3	Learn to evaluate deductions, exemptions, and rebates available under Indian tax laws to optimize tax liability.
4	Learn the processes and procedures involved in tax assessment and compliance for different entities.
5	Learn effective tax planning strategies to ensure compliance while minimizing tax burdens.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Demonstrate a thorough understanding of the Income Tax Act and its application in various scenarios.
CO2	Accurately assess taxable income from diverse sources and determine applicable tax liabilities for individuals and businesses.
CO3	Effectively utilize deductions, exemptions, and rebates to create optimized tax strategies.
CO4	Navigate the tax assessment process and ensure compliance with legal requirements and deadlines.
CO5	Analyse the impact of recent legislative changes on direct taxation practices in India.
CO6	Formulate comprehensive tax planning approaches that align with both regulatory requirements and financial goals.

BBA VI Semester (AR23)

Course Code	Course Title	L	T	P	C
BB605	CROSS CULTURAL MANAGEMENT	3	0	0	3

Course Description

This course explores the dynamics of managing diverse cultural perspectives in a global business environment. Students will examine key concepts in cross-cultural communication, negotiation, and leadership, gaining insights into how cultural differences influence organisational behaviour and decision-making. Students will develop practical skills for fostering collaboration and understanding in multicultural teams. The course emphasises the importance of cultural awareness in achieving effective management strategies, enabling students to navigate the challenges and opportunities presented by globalisation in today's workplace.

Course Objectives

1	Learn cultural differences on communication styles and management practices in diverse work environments.
2	Understand various strategies for effective cross-cultural communication and conflict resolution in multinational teams.
3	Learn the role of cultural intelligence in enhancing leadership effectiveness and team dynamics.
4	Learn various cultural frameworks and models to understand their influence on organizational behaviour.
5	Understand actionable plans for fostering inclusivity and collaboration within culturally diverse teams.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Evaluate and compare different cultural frameworks to analyse their impact on organisational behaviour.
CO2	Design training programs that enhance cultural awareness and competency among employees in diverse settings.
CO3	Apply effective cross-cultural communication techniques to resolve conflicts and enhance teamwork in diverse settings.
CO4	Design and implement strategies that promote inclusivity and collaboration in multicultural teams.
CO5	Evaluate the impact of cross-cultural differences on international human resource management (IHRM) practices and policies.
CO6	Assess the challenges and opportunities of managing a global workforce, emphasizing the integration of diverse cultural perspectives in IHRM.

BBA VI Semester (AR23)

Course Code	Course Title	L	T	P	C
BB606	PERFORMANCE MANAGEMENT	3	0	0	3

Course Description

This course provides a comprehensive overview of performance management systems and practices within organizations. Participants will explore key concepts, tools, and techniques for setting performance expectations, providing feedback, and conducting evaluations. The curriculum covers the design and implementation of performance metrics, goal-setting strategies, and the role of ongoing coaching and development. Emphasis will be placed on aligning individual performance with organisational objectives, fostering a culture of continuous improvement, and leveraging technology to enhance performance tracking. Students will gain skills to effectively manage and motivate teams, ultimately driving organizational success.

Course Objectives

1	To understand the basic concepts of „Performance Management“ and as a tool to measure performance of employees in the workplace.
2	To identify the fundamental concepts of performance management in Case analysis.
3	To acquire knowledge in measuring performance and managing in organizations.
4	To evaluate the model of performance management system.
5	To know the various methods of performance appraisal for effective management.

Course Outcomes

(Upon successful completion of this course, students should be able to)

CO1	Understand and articulate the fundamental concepts, objectives, and role of HR professionals in Performance Management.
CO2	Analyse the characteristics and functions of Performance Management Systems, integrating theories of goal-setting with corporate and individual performance.
CO3	Evaluate the importance of Performance Planning, including the methodologies and processes that drive effective performance outcomes.
CO4	Assess the objectives, methods, and ethical considerations involved in Performance Appraisal, and their impact on organisational performance.
CO5	Develop an understanding of the process of Performance Monitoring, including documentation, audits, and leading high-performance teams.
CO6	Identify and overcome barriers to effective performance planning, ensuring alignment between organizational goals and individual performance objectives.

Course Code	Course Title	L	T	P	C
BB600	SIP VIVA VOCE	0	0	0	3

Course Description								
This course is designed to evaluate and enhance students' practical experience gained during their summer internships. Through a structured VIVA VOCE format, students will present their internship projects, highlighting their contributions, challenges faced, and key learnings. The course emphasises critical thinking and effective communication, as students articulate their experiences and insights to a panel of faculty and industry experts. Students will receive constructive feedback, allowing them to refine their understanding of real-world business practices. This course aims to bridge academic knowledge with practical application, preparing students for future professional endeavours.								
Course Objectives								
1	Evaluate and articulate the practical experiences gained during the summer internship.							
2	Develop effective presentation skills to communicate project outcomes and insights.							
3	Demonstrate critical thinking by analysing challenges and solutions encountered in the internship.							
4	Foster the ability to connect theoretical knowledge with real-world business practices.							
5	Receive constructive feedback to enhance personal and professional development.							
Course Outcomes								
<i>(Upon successful completion of this course, students should be able to)</i>								
CO1	Effectively present their internship projects and articulate key learnings.							
CO2	Demonstrate improved communication and public speaking skills.							
CO3	Analyse and discuss real-world challenges faced during their internships.							
CO4	Connect academic concepts to practical applications in business settings.							
CO5	Exhibit enhanced critical thinking and problem-solving abilities.							
CO6	Appraise their experiences gained during the program.
